

NEMESI PROJECT (Network for Mutual Exchange for Supporting Innovation)

ICT SCENARIO

Information technologies have evolved at an impressive pace in recent years, creating new needs and at the same time providing new solutions and new spaces for professionalisms once unthinkable.

Today's world, more and more oriented to information sharing, to social aspect, has opened up new possibilities, and while on the one hand are very popular figures that make the social (and the continuing promotion) its core business , are also increased the demands for IT security experts. Protecting your IT infrastructure means protecting your business.

Essentially, talking about ICT in 2014 means dealing with an almost limitless number of professions, specializations, skills of the most varied kind.

We have attached, in order to simplify the understanding of the most representative figures, two documents relating to the most innovative and requested professionals of the contemporary ICT market .

- ***“CEN Workshop Agreement – European ICT Professional Profiles”***
 - Developer
 - Digital Media Specialist
 - ICT Security Manager
 - Network Specialist
 - System Administrator
