

## EU WORKSHOPS DETAILS – NEMESI PROJECT

1. **WHEN:** 7 October 2014 from 9.00 to 13.30.
2. **WHERE:** Hosting partner – ISM- Mainz - Germany
3. **THE WORKSHOP**

The workshop will focus on:

- **Current and structural challenges of competence development, such as the competition for qualified personnel**

The workshops will be organized around some presentations and round table discussions. Specifically the emphasis is on actions:

- relating to the skills needs identification and skills matching in the digital and green economy.
- led and supported by stakeholders partnership
- with a significant "European added value"

This "European added value" could, for example, result from any of the following:

- the inherent European scope of an action (such as stakeholders partnership serving Europe).
- benefits from cross-border co-operation (such as a network of complimentary training centers, SMEs, PES in different countries).
- so-called "best practice" actions to demonstrate and promote innovative schemes with European relevance (where the demonstration itself may take place locally).

### 4. AGENDA

09:00- 9:30	Registration of the participants
