

## EU WORKSHOP DETAILS – NEMESI PROJECT

**WHEN:** 1 July from 9.15 to 16.00

**WHERE:** Hosting partner - Crea (Entrepreneurial Association of Aragon) – Saragozza, Spain

### THE WORKSHOP

The workshop will focus on:

- **How to identify skill gaps in SMEs through effective collaboration between sectors in the ICT and the green economy.**
- **Overcoming organizational barriers and obstacles for partnership.**

The workshops will be organized around some presentations and round table discussions. Specifically the emphasis is on actions:

- relating to the skills needs identification and skills matching in the digital and green economy.
- led and supported by stakeholders partnership
- with a significant "European added value"

This "European added value" could, for example, result from any of the following:

- the inherent European scope of an action (such as stakeholders partnership serving Europe).
- benefits from cross-border co-operation (such as a network of complimentary training centers, SMEs, PES in different countries).
- so-called "best practice" actions to demonstrate and promote innovative schemes with European relevance (where the demonstration itself may take place locally).

### Draft Agenda for the 1<sup>st</sup> July

9.15 registration of participants
